EXPERIENCE

QA Engineer in WeGoTrip	
Company:	WeGoTrip, OU
Project:	WeGoTrip
Company Location:	Tallinn, Estonia
Website:	wegotrip.com
Location type:	Remote
Duration:	11/2022 - present
Position:	QA Engineer
Summary:	<p>During our collaboration I have managed to improve the testing process in the development team: I introduced the requirements review, a system for creating and storing test documentation, and covered most of the functionality of mobile applications with hand-held test cases. This allowed the introduction of regression testing into the development process.</p> <p>Together with managers, we have improved scrum processes in the development team.</p> <p>Also, I helped some other departments of the company to solve the problem with QA flow optimization.</p>
Responsibilities:	<p>Functional testing MOBILE (system/ integration layer)</p> <p>UI testing MOBILE</p> <p>Requirements testing</p> <p>Test design</p> <p>Reporting bugs</p> <p>Technical support other teams</p> <p>Verification customers technical incident</p> <p>Scrum activities</p>
Tools & Technologies:	<p>Android Studio</p> <p>LambdaTest</p> <p>Charles</p> <p>Figma</p> <p>QASE</p> <p>ClickUp</p>

Senior Software Test Engineer in IBS	
Company:	IBS Expertise, LLC
Project:	Payments&Transfers (SberBank project)
Company Location:	Saint Petersburg, Russia
Website:	ibs.ru sberbank.ru
Location type:	Remote
Duration:	02/2022 – 10/2022

Position:	Senior Test Engineer
Summary:	I was working on my partner's project as a manual tester. The team was doing regression testing on the backend. After a while, I was given tasks related to automated testing: launch and crash analysis. Later on, I was entrusted with creating test cycles and assigning tasks to the team. Also, I was a mentor to the trainees in the team.
Responsibilities:	Functional testing WEB/ MOBILE (system/ integration layer) Test design Running automated tests and crash analysis Reported bugs Active communication Regular training at the company's internal courses Mentoring
